Employee Appraisal System

Employee Appraisal System

The client requires a secure digital application to manage and streamline the appraisal workflow, replacing manual processes that are time-consuming, difficult to track, and prone to errors.

CORE REQUIREMENTS

1. NODAL OFFICER SETUP

The system should begin with the Nodal Officer assigning reviewing and reporting officers, configuring profiles, appraisal cycles, and related data.

2. EMPLOYEE SUBMISSION

Employees must be able to log in and submit appraisal details.

3. APPRAISAL EVALUATION

The submitted appraisal is evaluated by the Reporting Officer and further validated by the Reviewing Officer.

4. OUTCOME PRESENTATION

After evaluation, the appraisal outcome is presented to the employee for a final decision.

5. ACCEPTANCE / REJECTION FLOW

If the employee accepts, the process is completed; if rejected, the request is routed back to the Nodal Officer for reprocessing.

6. SYSTEM CAPABILITIES (MANDATORY)

- **Eliminate difficulties** in tracking and monitoring workflow status.
- **Role-Based Access Control:** Define precise user access based on organizational roles (Super Admin, Nodal, Reporting, Reviewing, Employee).
- **Secure Authentication & Data Protection:** Ensure sensitive appraisal data is protected at all stages.
- **Full-Lifecycle Visibility:** End-to-end monitoring of the workflow for all stakeholders.

Employee Appraisal System

Roles and Responsibility

Super Admin

- ✓ Employee onboarding and activation
- ✓ Assign roles, permissions, and access
- ✓ Monitor employee records

Nodal Officer

- ✓ Updated profile & Assigns reviewing and reporting
- ✓ Adds leave records & appraisal cycle
- ✓ Checks the final rating & provides disclosure

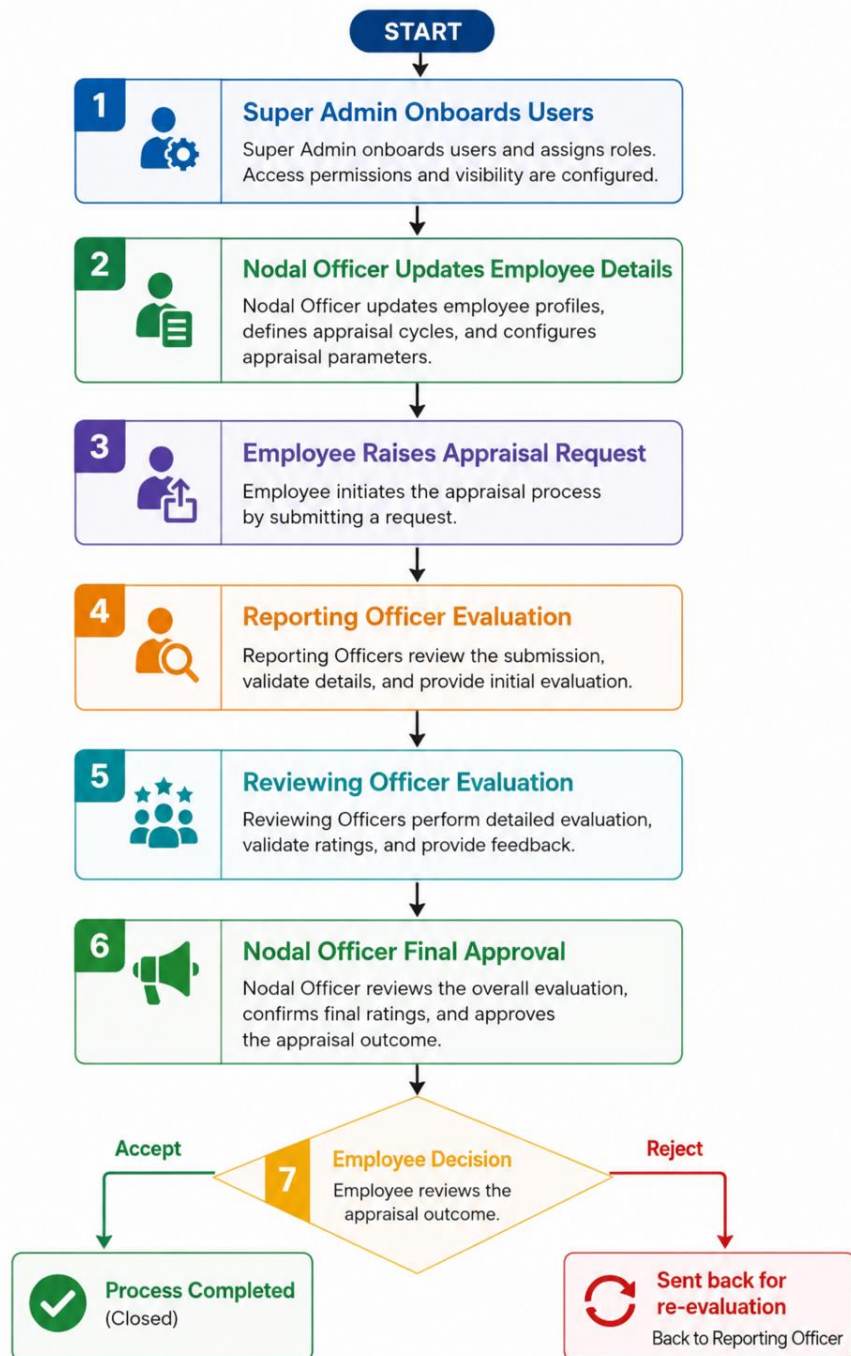

Reporting &
Reviewer

- ✓ Validated the appraisal form
- ✓ Provides Grading and review

Employee

- ✓ Validated his profile details
- ✓ Fills self appraisal form
- ✓ Submit for Appraisal

Appraisal Workflow Steps

Step 1: Super Admin Onboarding

Super Admin onboarding Employee and assigning roles. Access permissions and visibility are configured.

Step 3: Raise Appraisal Request

Employee raises the appraisal form.

Employee submits required details including work performance and additional remarks.
Status: Submitted to Reporting Officer

Step 5: Reporting Officer Evaluation

Reporting Officer reviews the submission, validates details, and provides initial evaluation.

Status: Forwarded to Reviewing Officer

Step 7: Employee Decision

Employee reviews the appraisal outcome:

Accept → Process completed

Reject → Sent back for re-evaluation

Step 2: Nodal Officer Configuration

Nodal Officer sets up employee profiles, defines appraisal cycles, and configures parameters required for the appraisal process. A unique appraisal ID is generated.

Step 4: Reviewing Officer

Reviewing Officer performs final validation and assigns final rating.

Step 6: Nodal Officer Disclosure

Nodal Officer analysis and releases the finalized appraisal outcome. Results are visible on the employee dashboard.

Status: Approved for Disclosure
